- Red Flag Warning in effect until 2100 hours Wednesday for areas in San Bernardino, Riverside, San Diego Counties.
- Red Flag Warning in effect until 2100 hours Thursday for areas in Ventura and Los Angeles Counties.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

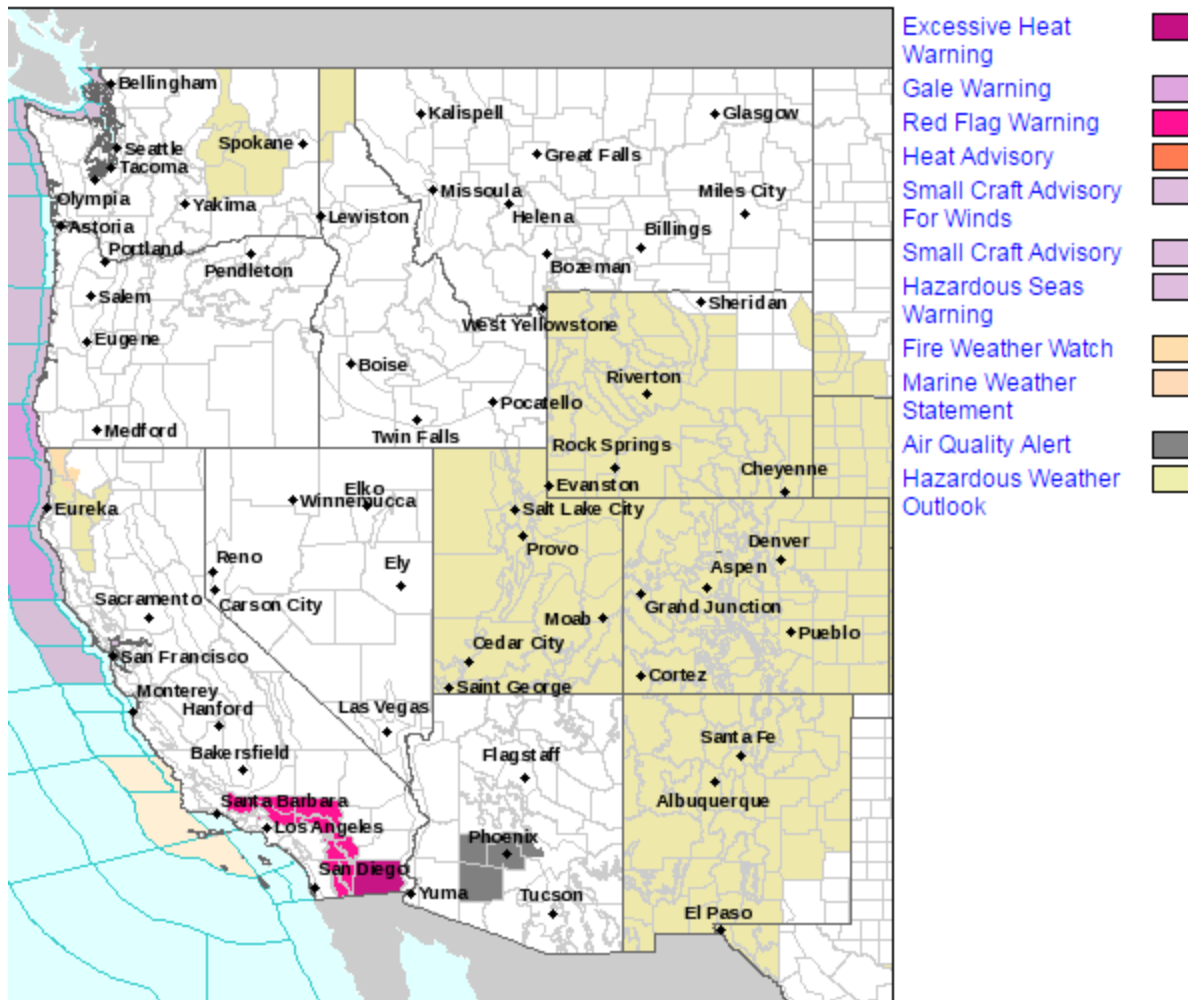

Strong and gusty winds across the mountains and deserts through Wednesday. Very dry away from the coastal areas through Thursday. Strong onshore flow will bring south to west afternoon winds of 15 to 30 mph with gusts to 50 mph to the Owens Valley, Kern County Mountains, Banning Pass, and the north sides of the Angeles and San Bernardino National Forests through Wednesday. The strong onshore flow will also cause the afternoon sea breeze to be a little stronger than usual over the next few days. Minimum humidity will remain mainly in the single digits and teens away from the coastal areas through Thursday as a very dry air mass remains in place. Nighttime humidity recovery will also be poor above and inland from the marine layer. Temperatures will remain around 10 degrees above normal today as strong high pressure sits off the Southern California Coast. Maximum temperatures will be in the mid 80s to mid 90s across the mountains, with mid 90s to 105 in the valleys. Temperatures will cool a few degrees both Tuesday and Wednesday as the high pressure area gets pushed further offshore. A weak area of low pressure will form off of Point Conception Thursday and spin there through this weekend which will bring near normal temperatures and a gradual increase in humidity to the area. This low will have little in the way of moisture, but it may create enough instability to produce isolated afternoon thunderstorms across the mountains and deserts Friday through this weekend.

SOUTHERN CALIFORNIA

Hot and very dry conditions will continue through Monday as strong high pressure sits off the California Coast. Maximum temperatures will be around 10 degrees above normal, with upper 80s and 90s across the mountains and upper 90s to 108 in the valleys. Minimum humidity will be mainly in the single digits and teens away from the coastal areas. The high pressure area will get pushed further offshore as a weak trough drops down the West Coast bringing a slow cooling trend Tuesday and Wednesday. There will be south to southwest afternoon winds of 15 to 25 mph with gusts to 40 mph across the Owens Valley, Kern County Mountains, and the north sides of the Angeles and San Bernardino National Forests Monday through Wednesday. The trough will break off from the main flow and a weak area of low pressure will form off of Point Conception Thursday and then remain nearly stationary through next weekend. This low pressure area will bring near normal temperatures to the area Thursday through next weekend. Minimum humidity will remain mainly in the single digits and teens away from the coastal areas through Thursday before increasing to between 15% and 30% Friday through next weekend. Isolated afternoon showers and thunderstorms will form mainly over the Sierra Friday through next weekend.
